Note: I have an 856 xl which is stuck in 4wd. I must have been checking electrical circuits and all is ok. I opened up the oil supply pipeline as well as there is no oil streaming so I got rid of the solenoid filter unit from the side of the transmission as well as ran the tractor as well as still no oil.

Case 856xl 856 XI International Diesel Tractor Parts Catalog Manual

I have a manual as well as among all the hydraulic circuit diagrams I can not see one for the 4wd. Does any person recognize exactly what the issue may be. Likewise I review that the gearbox oil is different compared to the hydraulic oil exactly what is the story with this as well as where are the different fill factors as well as oil kinds. Hytran I think for hydraulics? Any type of and all assistance appreciated, thank you.
